

BP1000

HEAVY-DUTY AIR PURIFIER

Using a 5 stage filtration system, this versatile and cost-effective unit offers enhanced protection against a wide range of airborne pollutants including chemical compounds, gases, odors and particles.

The BP1000 is designed for continuous duty operation and offers superior air filtration for small to medium indoor applications.

For specific applications that require localized removal of airborne pollutants, the BP1000 can be fitted with various ducting accessories or articulated fume capture arms.
